CONCRETE

Journal of The Concrete Society

Managing Editor
P V Maxwell-Cook

Editor
Jack Barfoot

INDEX: Volume 20, 1986

CONCRETE and The Concrete Society (limited by guarantee) are responsible neither for the statements made nor the opinions expressed in the journal.

ARTICLES

A

A change of image 8:27
A European standard for concrete 5:8
A new name and a wider market 3:37
A review of concrete in the oceans 1:21
A63...Hull...Composite pavement 6:30
Abrasion resistance, recent research developments in 11:29
A chance to meet Jan Brobowski 9:12
Admixtures — present and future trends 8:4
Admixtures, for UK, Grace 8:16
Aldermaston, Marley caps with 0.25 million tiles 4:37
Alternative cements for hot climates 2:18
An expandable sleeve test for insitu concrete strength evaluation 3:24
ARC upgrade, Catterick pipe works 8:23
Ash in concrete — using with confidence 8:11
Ash in concrete — using with confidence (Part 2) 9:22
Associations — The Drilling and Sawing Association, The 11:33
Authors sought, making concrete details work 6:26
Automatic mode, plugging in testing machines to 12:11
Automation comes to prestressing 4:47
Award, CS '87 6:5

B

BAUMA '86, premier auf der 5:30
Blastfurnace slag, BS6699 — a standard for ground granulated 8:13
Blockwork retaining wall, the structural design of 7:19
Blockwork, the structural potential for 7:11
Brick, the concrete engineering quality, a foot in the door 4:19
Brickwork, rain resistance of 7:16
Bridge design, in Texas, fin back 5:23
Bridge superstructure, removal of a major 6:38
Bridge, incremental launching at Shoreham 11:7
Bridge, Taf Fawr — Part two 9:31
Bridges buildings and other structures, some UK achievements in 1:10
Bridges in rural areas, small 11:19
Bridging the Torridge at Bideford 9:18
Brisbane landmark, The Colonial Mutual — a 12:31
Bobrowski, a chance to meet Jan 9:12
Brunel, how would he have got on today? 7:31
BS 8110: 1985, Structural use of concrete, handbook to 1:36
BS6699 — A standard for ground granulated blastfurnace slag 8:13
BS8110 — is it on the right track? (CS Scene) 7:23
Buildings and other structures, some UK achievements in, bridges 1:10
Buildings, cracking in reinforced 5:28

C

Calculating concrete pressures on formwork 3:6
Can British standards codes, and QA schemes support innovation? (CS Scene) 5:17
Cardiff debut for UK's largest launching girder 3:8
Catterick pipeworks, ARC upgrade 8:23
Cement properties, effects of changes in, on the temperature of concrete 2:26
Cements for hot climates, alternative 2:18
Chloride diffusion with super-plasticisers, reduction in permeability 8:9
Chloride in concrete, the distribution of 12:9
Cladding in large panel structures, the security of 6:33
Colonial Mutual — a Brisbane land-mark, The 12:31
Composite construction, recent trends in 2:5
Composite pavement...A63...Hull 6:30
Computerised ready mixed mortar plant at Coventry 3:35
Concrete Day 7:24
Concrete Day '86, bigger and better (CS Scene) 3:27
Concrete Day '86 4:25
Concrete engineering quality brick — a foot in the door, the 4:19
Concrete in hazard protection 1:35
Concrete on your bookshelf 4:38
Concrete Society Award '86 6:5
CS Scene — Value for money 6:23
CS Scene: Images of concrete 2:31
Concrete Society, the work of, testing concrete durability 1:29
Concrete suspended flooring systems 2:9
Concrete today — a complex international material 5:7
Cracking in reinforced concrete buildings 5:28
Cracks in concrete — which ones matter? (CS Scene) 10:33
Cranes, straddle, 'a superior alternative' 3:33
Curing, temperature matched, dev. appl. & future in conc prac & research 7:27
Curing, temperature matched: its dev. appl. & future in conc prac & research 10:28

D

Degradation of concrete structures — an emerging phenomenon 5:10
Design and construction of...composite pavement...A63...Hull 6:30
Design and construction of concrete roads, UK practice 6:29
Developing world, and the FIP 1:9
Diaphragm walls, site practice award 12:29
Distribution of chloride in concrete, The 12:9
Domes, sprayed storage 3:31
Drilling and Sawing Association, The 11:33
Durability, testing concrete, the work of the concrete society 1:29

E

Effects of changes in cement properties on the temperature of concrete 2:26
European standard for concrete, A 5:8
Exhibitors at FIP 1:17
Experience of fires in concrete structures 8:19

F

Fifth International Symposium on Concrete Roads 6:29
Fifty years of tunnel linings 11:21
Fin back bridge design in Texas 5:23
FIP and the developing world 1:9
FIP, exhibitors at 1:17
Fires, experience of in concrete structures 8:19
Flexible frame for Torrington project 4:9
Flexible pavements with concrete, overlaying 5:26
Float, it will never 1:38
Flooring systems, suspended, concrete 2:9
Flooring, precast concrete, trends in 4:11
Floors, ground, for the 21st century (CS Scene) 4:41
Formwork focus 3:15
Formwork guide — what's in it for the precaster?, The (CS Scene) 12:23
Formwork, a guide to good practice 1:27
Formwork, calculating concrete pressures on 3:6
Fresh concrete business, The 5:14

G/H

Getting the best from concrete 9:33
Girder, launching, UK's largest, Cardiff debut for 3:8
Grace admixtures for UK 8:16
Granulated blastfurnace slag, BS6699 a standard for ground 8:13
Ground floors for the 21st century (CS Scene) 4:41
Handbook to BS8110: 1985, structural use of concrete 1:36
Hazard protection, concrete in 1:35
Hot climates, alternative cements for 2:18
How would Brunel have got on today? 7:31

I

Images of concrete, (CS Scene) 2:31
Imprinted patterns, technique with a future? 2:12
Improvement of management techniques for quality production..... 5:11
In situ concrete, expandable sleeve test for strength evaluation 3:24
Incremental launching at Shoreham bridge 11:7
Indian power project 1:43
Interbuild, new at 1:45
International, material, concrete today — a complex 5:7
Investment policy, Marshalls' pays off 44:14
It will never float 1:38

J/K

Japan and concrete (CS Scene) 9:25
Killicrankie Pass, the way through 11:13

L

Launching girder, UK's largest, Cardiff debut for 3:8
Linings, fifty years of tunnel 11:21

M

Maintenance and rehabilitation of concrete roads 6:32
Making concrete details work — authors sought 6:26
Management techniques, improvement of for quality production 5:11
Marine concrete '86 9:4
Maritime aspects of concreting 10:38
Marley caps Aldermaston with 0.25 million tiles 4:37
Marshalls' investment policy pays off 4:14
Masonry, reinforced and prestressed 7:6
Mass concrete voussoir arches 2:29
Microsilica, the production of 8:17
Middle East town, purple concrete in 2:36
Monitoring pays dividends, structural 12:13
Mortar plant at Coventry, computerised ready mixed 3:35
Mould system firm's decade of development 3:13

N/O

New at Interbuild 1:45
Obituary (Prof A L L Baker) 7:35
Oceans, a review of concrete in the 1:21
Omnia's natural regrouping 10:41
Overlaying flexible pavements with concrete 5:26

P/Q

Panel structures, the security of cladding in large 6:33
Patterns, imprinted, technique with a future? 2:12
Pavements, with concrete, overlaying flexible 5:26
Permeability and chloride diffusion with superplasticisers, reduction 8:9
Permeability testing of site concrete, possibilities & relevance CS Scene 11:23
Permeability, pfa in structural precast concrete, measurement of 12:4
Pfa in structural precast concrete: full scale factory trials 1:40
Pfa in structural precast concrete — measurement of permeability 12:4
Pipeworks, ARC upgrade Catterick 8:23
Plugging in testing machines to automatic mode 12:11
Power project, Indian 1:43
Practice, a guide to good formwork 1:27
Precast concrete — products and projects 4:22
Precast concrete, quality assurance of 4:7
Precast concrete, structural, pfa in: full scale factory trials 1:40
Precaster, The formwork guide — what's in it for the 12:23
Premier auf der BAUMA '86 5:30
President, Welcome from 1:7
Pressures on formwork, calculating concrete 3:6
Prestressed masonry, reinforced and 7:6
Prestressing, automation comes to 4:47
Production of microsilica, The 8:17
Protection, concrete in hazard 1:35
Purple concrete in a Middle East town 2:36
Quality assurance of precast concrete 4:7
Quality assurance, effect and influence 1:39

R

Rain resistance of concrete brickwork 7:16
RAM, ten years of 12:18
Ready mixed mortar plant, at Coventry, computerised 3:35
Recent research developments in abrasion resistance 11:29
Recent trends in composite construction 2:5
Reconstructed stone for prime London site 4:17
Reduction in permeability and chloride diffusion with superplasticisers 8:9
Rehabilitation of concrete roads, maintenance and 6:32
Reinforced and prestressed masonry 7:6
Reinforced concrete buildings, cracking in 5:28
Removal of a major bridge superstructure 6:38
Retaining wall, the structural design of a blockwork 7:19
Roads, fifth international symposium on concrete 6:29
Roads, maintenance and rehabilitation of 6:32
Roads, UK practice for the design and construction of 6:29
Rural areas, small bridges in 11:19

S

Sawing Association, Drilling and 11:33
Security of cladding in large panel structures, The 6:33
Shoreham bridge, incremental launching at 11:7
Site concrete, permeability testing of CS Scene 11:23
Site practice award for diaphragm walls 12:29
Sleeve test, expandable, for insitu concrete strength evaluation 3:24
Small bridges in rural areas 11:19
Some UK achievements in bridges, buildings and other structures 1:10
Sort for all seasons 7:15
Sprayed storage domes 3:31
Standard, for concrete, a European 5:8
Standards codes and QA schemes, British (can they support innovation?) 5:17
Stone, reconstructed, for prime London site 4:17
Storage domes, sprayed 3:31
Straddle cranes, 'a superior alternative' 3:33
Structural design of a concrete blockwork retaining wall, The 7:19
Structural monitoring pays dividends 12:13
Structural potential for concrete blockwork, The 7:11
Structural precast concrete, pfa in: full scale factory trials 1:40
Structural use of concrete, handbook to use of BS8110:1985 1:36
Structures — an emerging phenomenon, degradation of concrete 5:10
Superplasticisers, reduction in permeability and chloride diffusion with 8:9
Superstructure, removal of a major bridge 6:38
Suspended flooring systems, concrete 2:9
Symposium on concrete roads, fifth international 6:29

T

Taf Fawr bridge — Part two 9:31
Temperature matched curing, dev. appl. & future in conc, prac & research 7:27
Temperature matched curing: its development, appl. & future in c. prac & research 10:28
Temperature of concrete, effects of changes in cement properties 2:26
Ten years of RAM 12:18
Testing concrete durability, the work of the concrete society 1:29
Testing firm's efficiency accolade 12:15
Testing machines, plugging in to automatic mode 12:11
Testing trends 12:21
Texas, fin back bridge design in 5:23
The circus is in town! 5:21
Tiles, Marley caps Aldermaston with 0.25 million 4:37
Torridge, bridging the at Bideford 9:18
Torrington project, flexible frame for 4:9
Trends in precast concrete flooring 4:11
Tunnel linings, fifty years of 11:21

U

UK achievements in bridges, buildings and other structures 1:10
UK practice for the design and construction of concrete roads 6:29
Using ash in concrete — with confidence (Part 1) 8:11
Using ash in concrete — with confidence (Part 2) 9:22

V

Viaduct for a Victorian environment 11:17
Victorian environment, viaduct for 11:17
Voussoir arches, mass concrete 2:29

W

Wall, the structural design of a blockwork retaining 7:19
Way through Killicrankie Pass, the 11:13
Welcome from the President 1:7
WOC exhibitors 10:10
WOC seminars 10:4
World of concrete 10:4
